REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-3 is the inclusion of an exfoliating member and restricting members provided at the ends of the exfoliating member and brought into contact with the surface of the fixing roller so that an interval between the surface of the fixing roller and the exfoliating member is restricted. Both end portions of the fixing roller extend beyond respective end portions of the pressing roller in the axial direction, such that the extended end portions of the fixing roller are outside the press contact portion. The restricting members are brought into contact with the extended end portions of the fixing roller which are outside the press contact portion. This is found in all of claims 1-3, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 4 and 17 is the inclusion of an exfoliating member and restricting members provided at both end portions of the exfoliating member, and brought into contact with the surface of the fixing roller so that an interval between the surface of the fixing roller and the exfoliating member is restricted. The outer edge portion of each of the restricting members is arranged outside of each of both end portions of the fixing roller in the axial direction. This is found in all of claims 4 and 17, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 10-16 is the inclusion of an exfoliating member and restricting member contacting a first region of the surface of the first roller to control the distance between the surface of the first roller and the

exfoliating device and does not contact a second region. A second roller contacts the second region of the first surface of the first roller and does not contact the first region. Both end portions of the first roller extend beyond respective end portions of the second roller in a longitudinal axial direction, such that the extended end portions of the first roller comprise the first region of the surface when viewed along the longitudinal axial direction of the first roller. This is found in all of claims 10-16, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
